**10. FEE CALCULATION**

**a. Determine Project Area** – The area of a floor is the area bounded by the exterior surface of the building walls or the outside face of columns where there is no wall. Area includes all floor levels such as subbasements, basements, ground floors, mezzanines, industrial equipment platforms, balconies, lofts, decks, all stories and all roofed areas including porches and garages, except for cantilevered canopies on the building wall. Use the roof area for free standing canopies. Total project area is the summation of all floor areas that are part of this project. Attach a separate sheet if necessary for the calculations below.

Floor Level (specify)	Length	X	Width	=	Area
		X		=	_____
		X		=	_____
		X		=	_____
		X		=	_____
		X		=	_____
		X		=	_____
