

Tree Trimming Program

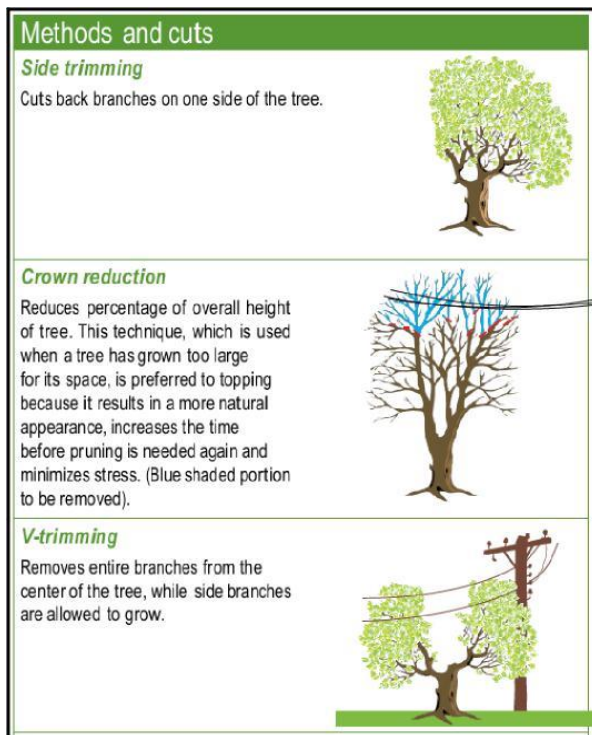

On a rotation basis, Two Rivers Utilities line crews trim about a quarter of the trees along the power lines each year. The city will be broken down into these quadrants and years:

Eastside: December 2024-March 2025

Southside: November 2025-March 2026

Northside: November 2026-March 2027

Central: November 2027-March 2028

Why Trim?

Without adequate clearance between trees and power lines, contact between the two can cause radio and television interference or power outages. These problems are especially severe during high wind conditions or heavy ice and snow loading.

How far away do branches need to be?

In general, we will be working to provide clearance of ten (10) feet above, below and to the sides of our high voltage lines.

The secondary & services lines require three (3) feet in all directions for proper clearance.

Will the Tree debris be removed?

The crews will pick up the pruned branches unless you specifically request that they be left on site. As always, our crews will endeavor to avoid damage to your lawn and will clean up when they are finished.

Other Questions or Request?

You can contact our operations office during business hours at 920-793-5550.
